EXPERIENCE

Senior UX/UI Graphic Developer

ESC Automation

April 2013 - Present

Calgary AB

Responsibilities: As the lead for the Calgary office UI team;

- Create graphics for clients based off of job books using the front end development application; Enteliviz Designer.
- Build 3D/2D floor plan diagrams using DWG files, Photoshop and Sketch Up Pro.
- Have customer meetings to determine custom templates and layouts are needed for the project.
- Distribute jobs to other graphic department members

Key Accomplishments:

- Create templates, as well as set the design standards used company-wide (including offices in Surrey, Vancouver, Edmonton, Toronto, Oregon, Seattle, and Portland)
- Lead the managers of all the graphics departments in discussions about future development, progress on jobs, and overall developments within the company
- Develop and implement new UI/UX aspects and standards

UX/UI Graphic Designer - Commission work

Wardens of the Red Tower: Sports Group

November 2020

Calgary AB

- Designed a website using Adobe XD for sports group by having a meeting with the developer to sketch and create a low res mock up. Then created mock ups and sent them off to the developer. <https://wardensoftheredtower.ca/>
